Skills

Programming Languages

HTML, CSS , Javascript , PHP , MYSQL,MongoDB

Frameworks and Libraries

Typescript , NodeJs , Express , React , Scss , Tailwindcss , React Redux,

Tools & Platforms

Cloudinary , AWS , Jira , Git , Github

Selected Projects

Restaurant Web App(taste-eat)

A complete website with the aim of allowing users book reservations , read blogs , read and contact chefs and as well browse through dishes. Has the admin section also where admin can edit , add , update or delete blogs , chefs or dishes. This is highly performant and scalable in production

Hubspot Homepage Clone

Clone of the homepage of one of the best websites that offers softwares , tools and resources for your business

Blog App(read.cash clone)

Growing up , I was at an advantage to get to know of a website called read.cash where I could write articles and get paid. I therefore decided to create a blog app that mimicks what that website does
